Status of the claims is as follows:

Claims 1-10, 15 and 21-26 have been cancelled; and

Claims 11-14, 16-20, and 27-35 (31-35 newly added) are herein addressed below.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-14, 16-20, and 27-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marshik (6,817,142) in view of Bujese et al. (4,229,096). Marshik (6,817,142) discloses an integrated tilt-latch/sash lock assembly (10) comprising an upper sash (4) having a keeper (see figure 1), a lower sash (2) having a lock assembly (10) attached thereto, the lock assembly (10) having a housing with a cover (34) (see Figure 16), a master frame (8) mounting both sashes (2 and 4), a tilt latch mechanism (22) operatably connected to a rotor (20) and supported by the rail (see figure 1b) and having a latch bolt (28), an actuator (30, including a handle and portion which connects to the rotor 20) connected to the rotor (20) via pawl (18) such that the actuator moves to three different positions (column 2, lines 37-59) which includes unlatching between the lower sash (2) and upper sash (4), to a second position which allows the sash to slide, and a third position which allows the sash to be tilted. Marshik ('142) fails to show indicia. Bujese et al. (4,229,096) disclose the housing/escutcheon having indicia. It

would have been obvious to one of ordinary skill in the art at the time of the invention to provide the handle of Marshik ('142) with indicia as taught by Bujese et al. ('096) since indicia allows one to visually see the multiple positions of the handle and more specifically the three positions which the window is capable of moving.

Applicant's arguments with respect to claims 11-14, 16-20, and 27-35 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
